

### Jody's Homemade Liquid Starch

Mix 2 cups water and 1 Tbsp. corn starch in a saucepan. Heat and stir until just starting to boil. Cool and pour into a spray bottle. Shake just before using. I like to spray the wrong side of the fabric lightly, fold in half (wrong sides together) and let sit for 10-15 minutes, then press both right sides without unfolding until the fabric feels completely dry. (Over time, this mixture can spoil—that's why the recipe is for just two cups. Toss it and make a new batch if it starts to smell bad.)
