

Create a 4.5" square of something you want to do. In this example it is hand applique. You want to make sure that it fits in the circle on the Fast 2 Fuse. Use a light, window or light box to see the shadow.

Press your work really nice and flat. Use Best Press if you need to, to get it crisp. Fuse the square to the Fast 2 Fuse, make sure you are fusing it to the side that doesn't have the circle drawn on it.

Flip over the ribbon topper and cut out the circle, using the template on the back side.

Satin stitch the edge of the ribbon topper. Below are some tips for you.

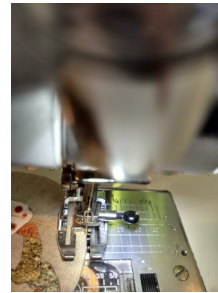

30 weight or thicker thread works best. Put it in the bobbin too. Use your open toed foot for zig zagging.

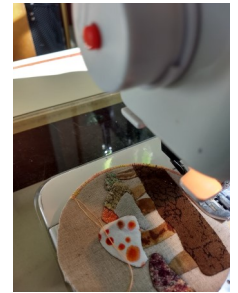

Set the machine for a fairly wide stitch (3.0) and a dense stick (.30)

Start on the topper, needle in the left position of the zig zag.

Let it "fall" just off the topper. Closing all the materials in the stitching

If you see fabric in between your stitches, you may consider doing it twice around.

**Front**

**Back**

Put your name on it!
